

```
const p: Promise<any> = // ...
```

```
p.then(() => console.log('world'))
```

```
console.log('hello')
```

What does this log?

```
const p: Promise<any> = // ...  
  
p.then(() => console.log('world'))  
console.log('hello')
```

Always:

hello

world

Because side effects
